PREFACE.

THE OBJECT of this work is to provide, within reasonable limits, and at a moderate price, a Dictionary of the English Language, pronouncing, explanatory, and etymological, sufficiently full in its vocabulary for general use.

THE VOCABULARY contains :

1. All classical English words now in use.
2. The obsolete and rare words in the works of our greatest writers from Spenser to Tennyson, the Authorised Version of the Scriptures, the Apocrypha, the Book of Common Prayer, and the Scotch Metrical Version of the Psalms.
3. All *important* scientific and technical terms.
4. All compound words that are not self-explanatory.
5. Participles and Past Tenses formed irregularly, placed under their verbs.
6. Comparatives and Superlatives of adjectives, in addition to the positive, when they are not formed by simply affixing *-er* and *-est*.
7. Irregular plural forms of nouns.
8. Numerous phrases, inserted under the most obvious catchword.

PRONUNCIATION.—The pronunciation of every word is given by re-writing it phonetically, thus obviating the use of a confusing array of marks. In this new spelling, every consonant used has its ordinary unvarying sound, none being employed that has more than one sound. The same sounds are always represented by the same letters, no matter how varied their actual spelling in the language. No consonant used has any mark attached to it, with the one exception of *th*, which is printed in common letters when sounded as in *thick*, but in italics when sounded as in *then*. *Unmarked vowels* have always their short sounds, as in *lad, led, lid, lot, but, book*. The *marked vowels* are shewn in the following line, which is printed at the bottom of each page—

fāte, fār; mē, hēr; mīne; mōte; mūte; mæn.

Where more than one pronunciation of a word is given, that which is placed first is the one more generally received.

MEANINGS.—The meanings of words are arranged in such an order as to exhibit their growth and history; the primary meaning being given first in italics, and the derived meanings in the order of their connection with the primary one. (*Lit.*), literally, before a meaning, signifies that that is the literal meaning, though it is not now, and may never have been in use in the language: (*orig.*), originally, implies that the meaning to which it is prefixed once existed, though now obsolete. Meanings peculiar to an author have his name attached to them;

thus, (*B*), (*Shak*), or (*Spenser*) prefixed to a meaning, implies that the meaning is used in the Bible, by Shakespeare, or by Spenser, as the case may be, though it does not necessarily imply that the ordinary meanings of the word may not also be used. Great care has been bestowed on the definitions of Scientific and Technical Terms, in order to render them scientifically accurate as well as popularly intelligible. To illustrate the meanings of such words as cannot be well explained without a diagram, nearly two hundred woodcuts have been introduced. These, however, have in no case been inserted merely for the purpose of pictorial embellishment.

SPELLING—Words variously spelled have their different forms given, the most approved being indicated. American spellings are also inserted.

ETYMOLOGY—The derivation of each word (so far as has been discovered) is given within brackets at the end, as being in many respects a preferable arrangement to that usually followed. In doubtful cases, the more probable etymologies have been inserted. Where no etymology is given, the derivation of the word is either unknown, or the usual explanations are unworthy of notice. The most recent authorities have been consulted, in order to render this portion of the work as accurate as possible, and great pains have been taken to present the results of their labours in an intelligible form.

THE APPENDIX contains a variety of useful lists—an account of the METRIC SYSTEM, as recommended by Government to be taught in schools—LIST OF PREFIXES AND AFFIXES—a VOCABULARY OF THE MORE COMMON SCOTTISH WORDS AND PHRASES to be met with in the writings of Burns, Ramsay, Scott, &c, prepared by WILLIAM WALLACE, M.A., Dumfries—a VOCABULARY OF AMERICANISMS, compiled chiefly from *A Glossary of Words and Phrases, usually regarded as Peculiar to the United States*, by JOHN RUSSELL BARTLETT, and *Americanisms*, by M. SCHELE DE VÈRE, LL.D.—RULES FOR THE PRONUNCIATION OF FOREIGN AND CLASSICAL WORDS—LIST OF WORDS, PHRASES, AND QUOTATIONS FROM THE GREEK, THE LATIN, AND MODERN FOREIGN LANGUAGES—LIST OF ABBREVIATIONS IN COMMON USE—a PRONOUNCING VOCABULARY OF SCRIPTURE PROPER NAMES—and HINTS FOR THE CORRECTION OF THE PRESS.

Throughout the progress of this work, the Editor has been most ably assisted by the Rev JOHN REITH, M.A., B.D., of Rickarton, and by JAMES T. CLARK, of the Advocates' Library, Edinburgh. He has also to acknowledge his obligations to ANDREW FINDLATER, LL.D., Editor of *Chambers's Encyclopædia*, for his kindness in reviewing the proof sheets of the work, and for numerous valuable suggestions.
